[How To Avoid The Mistakes Made In The UN Data Breach](#)

Target (2013)

What happened: Cyber attackers accessed Target's servers through **stolen credentials from a refrigeration contractor**. They accessed only 11 GBs of data but **compromised sensitive information for millions of customers**.

Outcome by The Numbers

Number Affected

110 million Target credit and debit card shoppers

Monetary Cost

\$202 million

Detection Time

16 Days

Notification Time

20 Days

Improvements to Mitigate Risk

To speed up their detection time, Target should have...

- **Automated security tasks** to quickly find data breach red flags.
- **Limited file access privileges** for third-party vendors.
- **Encrypted and separated cardholder data** to make it more difficult for hackers to access.
